

Domain Logon Over VPN

1

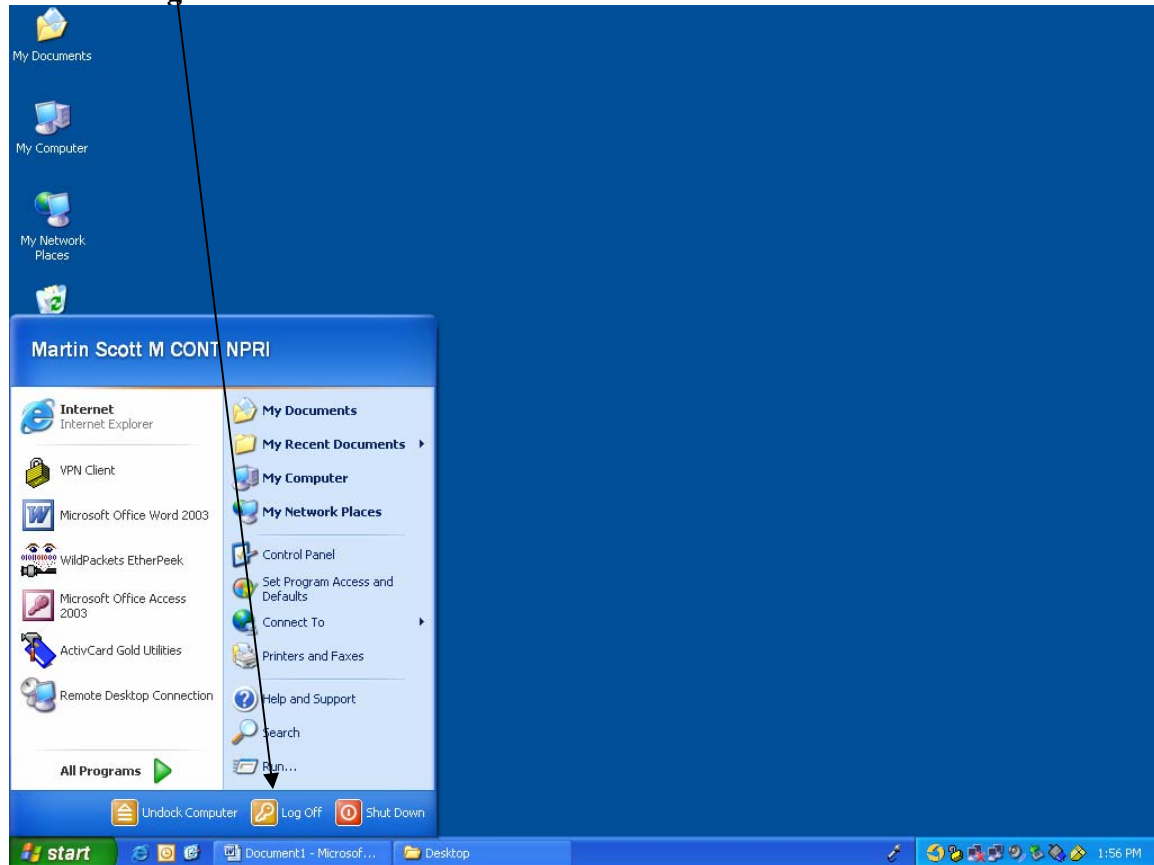

Logon to your computer.

1. Open the VPN Client. Choose **“Options”**
2. Choose **“Windows Logon Properties”**
3. Uncheck **“Disconnect VPN connection when logging off”**

4. Choose **“OK”** Note: this change to the VPN client only needs to be done once for your initial logon with CLO.
5. Choose **“Connect”**

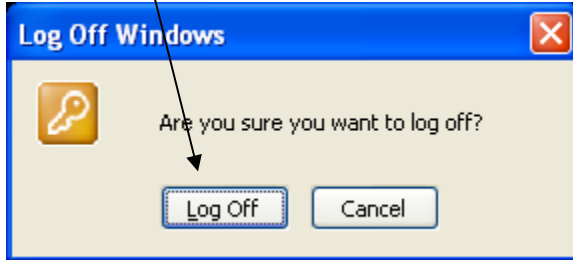

Choose **“Log Off”**

Domain Logon Over VPN

2

Choose “**L**og Off”

6. Log onto Your Domain account using your CAC card
7. The VPN tunnel will still be running.
8. You will now be able to access Domain resources with your CAC credentials.
